

Traffic source or destination.
Software Component in DNI

Network Interface

End / Intermediate

Common / SDN

Physical / Virtual

Source/Destination Flows:

SF1 App1

has: DF3: App3

has: DF4: App4

Routing (using Directions):

– Node: S1, Flow: DF3, via eth0, probability: 1.0, default

– Node: SW1, Flow: DF3, via eth1, probability: 0.5

– Node: SW1, Flow: DF4, via eth2, probability: 0.5

Alternative using FlowRoute:

– Route R1: Flow DF3, S1-eth0, SW1-eth0, SW1-eth1, S3-eth0, probability: 0.5

– Route R2: Flow DF4, S1-eth0, SW1-eth0, SW1-eth2, S4-eth0, probability: 0.5

The same!

Not important
for now
